5 minutes	45 minutes	90 minutes
13 \$	35 \$	68\$

BILLING

Plan	Min. Duration	Increments
Data	1.000 bytes	100 bytes
Voice	20 seconds	20 seconds

NOTE:

- Activation will require both the IMEI of the equipment and the ICCID of the SIM card.
- SIMs cannot be moved between terminals.
- The day of activations is the first day of the minimum period.
- The service can be activated up to a maximum of 3 voice lines dependent on equipment type. The lines can be activated as standard postpay or prepay line.
- Monthly subscription charges are prorated in the month of activation, are charged in advance and will be charged a full billing month on deactivation regardless of what date in the month the service is deactivated.
- For plans that have a 1-month minimum contract term, a full 1 month/allowance will only apply if activated on the 1st of the month.
- If an activation is made in the middle of a calendar month both the subscription fee and allowance are prorated.
- A service can be upgraded at any time or in line with the next billing period. A new minimum period will be applied once upgraded. For mid-month upgrades, the initial package will remain chargeable and the new subscription and allowance will be prorated.
- An *Early Termination Fee* (ETF) will apply if the service is deactivated or downloaded before completing the minimum contract period. This is a flat fee; it is not prorated based on the deactivation date.
- Any changes to plans will result in a new minimum term.
- Iridium will re-rate the pricing for any Maritime based terminals used with Land-mobile packages and vice versa. We will flow this down to the terminal owner.
- There is no rollover for unused data.
- A security deposit fee of three (3) months will be required upon activation of the service.
- All requests for activation, upgrades and deactivations must be made in writing and 10 days before the start of the new billing period.

Annual Plans:

- The maximum period is 12 months. Pay one fee and have access to all data which can be used at any time during the contract period. Any unused data at the end of the contract period is lost.
- If all the data is consumed before the end of the contract period, the contract can be renewed early. A new contract period/charge and data allowance would apply from the renewal date.

VSAT plan:

- The VSAT plan is to be used only as a secondary/complementary service and only when integrated with an associated VSAT service (the use of this service needs to be preauthorized by Iridium and VIDA, please allow time for this).
- The VSAT plan is to be used only when the VSAT service is not available for data services.
- Iridium reserves the right to immediately temporarily throttle/suspend or deactivate any service that it determines is not being used as above and/or, in Iridium's sole judgement, if it determines that such service constitutes a threat to the integrity of the Iridium Network including its ability to serve other Iridium customers.

Prepay Scratch Cards – for use with voice lines activated as prepay.

- Cards are available in virtual format. Voice service only.
- Iridium to Iridium and Iridium to PSTN only, the usage decrements in blocks of 20 units (seconds).
- The service is restricted from making any other calls,
- The balance of a card is not decremented until the called party picks up (call connected).
